Professional Summary

Computer Science Engineering graduate and AI Engineer at BlueOrbit Tech, with hands-on experience in AI and machine learning, Android and full-stack development, and enterprise IT operations. Previously worked as an IT Executive at BlueOrbit Tech, supporting CRM systems, user administration, VPN connectivity, telephony systems, network troubleshooting, hardware support, and branch-level IT operations, and completed internships in Android development and AI & prompt engineering. Strong foundation in Java, Python, JavaScript, Kotlin, REST APIs, SQL, databases, and structured troubleshooting. Passionate about designing scalable solutions, working in agile teams, and building AI-powered products with real-world impact.

Education

Bachelor of Engineering – Computer Science and Engineering	2026
Rajeev Institute of Technology, VTU Belagavi	CGPA: 8.47
Senior Secondary – PUC (PCMB)	89.5%

Experience

AI Engineer BlueOrbit Tech, Bengaluru	Oct 2026 – Present
IT Executive BlueOrbit Tech, Bengaluru	Aug 2026 – Oct 2026
• Provided day-to-day IT support for users and branch operations, troubleshooting hardware, software, CRM, network, and system-related issues. • Managed CRM user administration including user creation, removal of inactive users, login support, access configuration, and assistance with CRM workflows. • Configured and troubleshoot Zoiper and telephony systems, including agent credentials, dialer connectivity, and communication-related issues. • Troubleshoot VPN connectivity, IP configuration, static IP issues, internet connectivity, and branch-level network access problems. • Supported CRM and server availability issues by coordinating with development and network teams, investigating possible root causes, and verifying service restoration. • Performed hardware diagnostics and inventory management by testing CPUs, monitors, keyboards, mice, cables, and other IT equipment. • Assisted with system setup and technical onboarding for users, including CRM access, VPN configuration, login support, and basic troubleshooting. • Followed a structured troubleshooting process by identifying symptoms, isolating the affected component, checking configurations, coordinating escalation, implementing fixes, and validating the resolution.	
Android Development Intern (GenAI-Focused) MindMatrix, Bengaluru	Sep 2025 – Jan 2026
• Designed and built Controlio, an Android Employee Performance Tracker, using Kotlin following MVC architecture and object-oriented programming principles. • Implemented role-based access control with GenAI-driven performance insights, writing modular, reusable components across the application layer. • Integrated REST APIs and worked with application data and enterprise workflows. • Worked with Salesforce CRM to manage organizational data, understand CRM workflows, and troubleshoot platform-related issues. • Performed application testing, debugging, and issue resolution to improve application reliability. • Used Git for version control and collaborated with team members in an agile sprint workflow.	
AI & Prompt Engineering Intern VaultofCodes, Delhi	Jun 2025 – Jul 2025
• Designed and developed J.A.R.V.I.S, a full-featured AI assistant using the Gemini API and Flask, with a client-server architecture separating inference logic from the frontend. • Engineered a voice and text interaction system using the Web Speech API, handling async request/response flows and optimizing prompt design for accuracy and latency. • Delivered a working product end-to-end within a fast-paced internship cycle, iterating rapidly on user-facing features.	

Projects

- ITSM Hub – Internal IT Service Management SystemReact.js, Node.js, Express.js, MySQL
- Developed an internal IT Service Management platform for raising, tracking, assigning, and resolving IT support tickets.
 - Implemented ticket lifecycle management, user roles, branch management, issue categorization, priority handling, and support workflows.
 - Designed RESTful APIs using Node.js and Express.js with MySQL for managing users, tickets, branches, and support records.
 - Implemented role-based workflows and centralized ticket visibility to improve IT issue tracking and reduce manual coordination.

- SiteSculptor – AI Website BuilderReact.js, Node.js, Express.js, MongoDB
- Developed an AI-powered platform that generates responsive websites from natural language prompts.
 - Built backend services using Node.js and Express.js and integrated REST APIs with the React.js frontend.
 - Designed MongoDB data models for project storage and retrieval.
 - Debugged API integrations and implemented modular backend components to improve application reliability.

- SMS Spam Detection – Mobile ML ApplicationFlutter, Python, TensorFlow Lite
- Developed a mobile application to classify SMS messages as spam or legitimate using a machine learning model.
 - Trained and evaluated a text classification model and converted it to TensorFlow Lite for on-device inference.
 - Integrated the ML model with Flutter to perform real-time classification without continuous server communication.
 - Applied NLP preprocessing and model evaluation techniques to improve classification reliability.

- DriveGuard AI – Driver Drowsiness DetectionPython, OpenCV, Computer Vision
- Developed a computer vision system for detecting potential driver drowsiness from real-time camera input.
 - Implemented facial and eye-related visual analysis using Python and OpenCV.
 - Processed continuous video frames and designed the system for real-time monitoring and alert generation.

Technical Skills

Programming: Java, Python, JavaScript, Kotlin, Dart, SQL

AI & Machine Learning: TensorFlow Lite, Scikit-learn, OpenCV, NLP, Gemini API, Prompt Engineering, ML Pipelines

IT & Networking: Network Troubleshooting, TCP/IP, DNS, DHCP, VPN, IP Configuration, Static IP, LAN/WAN Fundamentals, Firewall Fundamentals, Hardware Troubleshooting

Systems & Enterprise IT: CRM Administration, Salesforce CRM, User Management, Access Management, Zoiper, Telephony/Dialer Support, System Administration, Incident Troubleshooting

Frontend & Mobile: React.js, Android (Kotlin), Flutter

Backend & APIs: Node.js, Express.js, Flask, REST APIs

Databases: MySQL, MongoDB, SQLite

Cloud & DevOps: AWS Cloud Fundamentals, Cloud Computing, Virtualization Fundamentals, Docker, CI/CD Fundamentals

Tools: Git, GitHub, Postman, VS Code, Android Studio

Core Concepts: Object-Oriented Programming, Data Structures, SDLC, Agile, MVC, Debugging, Testing, API Integration, Root Cause Analysis

Certifications & Leadership

- Certifications
- Salesforce Trailblazer Explorer – 16+ Badges
 - NPTEL Python Programming
 - UiPath Developer Associate
 - NSDC Cyber Security
- Activities & Leadership
- Participant – IGNITEX 2025 National Hackathon
 - Participant – GenAI Hackathon 2025
 - Coordinated TechKriti’24 Technical Event
 - Master of Ceremonies – Swarit 2026
