Professional Summary

Computer Science Engineering graduate with hands-on experience in IT administration, technical support, enterprise applications, networking, and software development. Currently working as an IT/Admin Intern at BlueOrbit Tech, supporting CRM systems, user administration, VPN connectivity, telephony systems, network troubleshooting, hardware support, and branch-level IT operations. Strong foundation in Java, Python, JavaScript, REST APIs, SQL, databases, cloud fundamentals, and structured troubleshooting. Interested in enterprise infrastructure, cloud technologies, systems administration, and reliable IT operations.

Education

Bachelor of Engineering – Computer Science and Engineering

2026

Rajeev Institute of Technology, VTU Belagavi

CGPA: 8.47

Senior Secondary – PUC (PCMB)

89.5%

Internship Experience

IT/Admin Intern | BlueOrbit Tech, Bengaluru

2026 – Present

- Provide day-to-day IT support for users and branch operations, troubleshooting hardware, software, CRM, network, and system-related issues.
- Manage CRM user administration including user creation, removal of inactive users, login support, access configuration, and assistance with CRM workflows.
- Configure and troubleshoot Zoiper and telephony systems, including agent credentials, dialer connectivity, and communication-related issues.
- Troubleshoot VPN connectivity, IP configuration, static IP issues, internet connectivity, and branch-level network access problems.
- Support CRM and server availability issues by coordinating with development and network teams, investigating possible root causes, and verifying service restoration.
- Perform hardware diagnostics and inventory management by testing CPUs, monitors, keyboards, mice, cables, and other IT equipment.
- Assist with system setup and technical onboarding for users, including CRM access, VPN configuration, login support, and basic troubleshooting.
- Follow a structured troubleshooting process by identifying symptoms, isolating the affected component, checking configurations, coordinating escalation, implementing fixes, and validating the resolution.

Android Development Intern | MindMatrix, Bengaluru

Sep 2025 – Jan 2026

- Developed application features using Kotlin following MVC architecture and object-oriented programming principles.
- Integrated REST APIs and worked with application data and enterprise workflows.
- Worked with Salesforce CRM to manage organizational data, understand CRM workflows, and troubleshoot platform-related issues.
- Performed application testing, debugging, and issue resolution to improve application reliability.
- Used Git for version control and collaborated with team members during software development activities.

Projects

ITSM Hub – Internal IT Service Management System

React.js, Node.js, Express.js, MySQL

- Developed an internal IT Service Management platform for raising, tracking, assigning, and resolving IT support tickets.
- Implemented ticket lifecycle management, user roles, branch management, issue categorization, priority handling, and support workflows.
- Designed RESTful APIs using Node.js and Express.js with MySQL for managing users, tickets, branches, and support records.
- Implemented role-based workflows and centralized ticket visibility to improve IT issue tracking and reduce manual coordination.

SiteSculptor – AI Website Builder

React.js, Node.js, Express.js, MongoDB

- Developed an AI-powered platform that generates responsive websites from natural language prompts.
- Built backend services using Node.js and Express.js and integrated REST APIs with the React.js frontend.

- Designed MongoDB data models for project storage and retrieval.
- Debugged API integrations and implemented modular backend components to improve application reliability.

SMS Spam Detection – Mobile ML Application *Flutter, Python, TensorFlow Lite*

- Developed a mobile application to classify SMS messages as spam or legitimate using a machine learning model.
- Trained and evaluated a text classification model and converted it to TensorFlow Lite for on-device inference.
- Integrated the ML model with Flutter to perform real-time classification without continuous server communication.
- Applied NLP preprocessing and model evaluation techniques to improve classification reliability.

DriveGuard AI – Driver Drowsiness Detection *Python, OpenCV, Computer Vision*

- Developed a computer vision system for detecting potential driver drowsiness from real-time camera input.
- Implemented facial and eye-related visual analysis using Python and OpenCV.
- Processed continuous video frames and designed the system for real-time monitoring and alert generation.

Technical Skills

Programming: Java, Python, JavaScript, SQL

IT & Networking: Network Troubleshooting, TCP/IP, DNS, DHCP, VPN, IP Configuration, Static IP, LAN/WAN Fundamentals, Firewall Fundamentals, Hardware Troubleshooting

Systems & Enterprise IT: CRM Administration, Salesforce CRM, User Management, Access Management, Zoiper, Telephony/Dialer Support, System Administration, Incident Troubleshooting

Backend & APIs: Node.js, Express.js, Flask, REST APIs

Databases: MySQL, MongoDB, SQLite

Cloud & DevOps: AWS Cloud Fundamentals, Cloud Computing, Virtualization Fundamentals, Docker, CI/CD Fundamentals

Tools: Git, GitHub, Postman, VS Code, Android Studio

Core Concepts: Object-Oriented Programming, Data Structures, SDLC, Agile, MVC, Debugging, Testing, API Integration, Root Cause Analysis

Certifications & Leadership

Certifications

- Salesforce Trailblazer Explorer – 16+ Badges
- NPTEL Python Programming
- UiPath Developer Associate
- NSDC Cyber Security

Leadership

- Organized National Level Hackathon – IGNITEX 2025
- Coordinated TechKriti’24 Technical Event
- Master of Ceremonies – Swarit 2026
